KOOLFAST™

WWW.KOOLFAST.COM

The Koolfast System is a groundbreaking design that chills beverage and food products in record time *without the use of ice*. Designed and developed by a Florida doctor, fed up with warm beer, this patented technology uses green innovation and recirculated, chemical-free water to **chill products to 32° in less than 5 minutes.**

This system *will revolutionize the bar and restaurant industry* by eliminating the need for storage ice, reducing labor efforts and freeing costly refrigeration space. The portable units can be used with catered events, for the transportation of products and at outdoor venues. The Koolfast System, made in the USA is a one time, must have purchase.

Take the Koolfast™ Challenge

Koolfast's chillers can chill beverages colder, faster, greener, and more efficiently than ice or refrigeration.

#WHYDOYOU

KOOLFAST

- *Reduce electrical cost by 75%* vs making ice.
- *Reduce water consumption infinitely* vs making ice.
- *Chill products five times (5X) faster* than on ice.
- *Recycle* super chilled water in a closed loop system.
 - *Reduce environmental impact* of plastic ice bags & wasted water resources.
 - *Reduce labor cost* of refilling ice bins.
- *Reduce/Eliminate Bar Rot* bartender hands.
 - *Maintain 32°* temperature **24/7/365**.
- *Maximize* bar space with **100% brand visibility**.
- *Eliminate “danger zone”* food temperature readings.
 - *Increase profits* by reducing costs.

The Chilling Unit

The chilling unit is available to help retro-fit your pre-existing set-up, what ever the configuration you have. This engine block, fits under any stainless steel bin configuration in your front or back bar set-up, within a minimum clearance of 12". Eliminate your need to add ice, by consistently chilling your products at a constant 32°, whether indoors or out.

Specifications

(Width x Height x Depth)

12" x 18" x 17"

Power = **115v @ 8.2 amps.** (See Energy Usage)

Ideal Running Water Temperature = 0°C (32°F)

Water Temperature Range = -1°C to 3°C (30°F to 39°F)

Features

All of our chilling units are patented and come with an industry standard 1 year parts & labor warranty and 3 years on compressor unit.

1. Monitoring system, accurately see via WiFi detailed reports transmitted daily.
2. Easy operation within the self contained unit..
3. Simple, clean and efficient, virtually maintenance free.

Save thousands of dollars with this simple little box.

COLD HARD FACTS...

TO BE CONSIDERED BEFORE REPLACING YET ANOTHER ICE MACHINE

- Non-metallic, corrosion-free housing
- Dramatically efficient super chill by eliminating change of state process
- Compact design allows unit to be tucked under the bar in previously unused space
- Fully-incorporated, self-contained system that monitors and maintains desired bin water level
- Opening up space formerly reserved for ice machines, now available for additional retail or value-add space
- Continuously recirculating, filtered water significantly reduces the incidents of yeast, bacteria and algae buildup
 - Go Green  Get Green . Recycle chilled water through closed loop system.

		ICE MACHINE	KOOLFAST™ LIQUID CHILLING PRODUCTS	YEARLY SAVINGS
SPACE	Cubic Space Required (cu ft)	84.5	2.5	82 cu ft
	Unit Dimensions	79" x 30" x 34"	18" x 18" x 13"	
	System Weight (lbs)	367	48	319 lbs
POWER	Power Cost	\$2,100	\$411	\$1,689
	BTU/hour	21,000	6,000	15,000
	Volts	230	115	
	Amperage	25 Amps	8.2 Amps	
WATER	Water Usage (gal)	70,000	4,000	66,000 gal
COST	Total System Cost	\$14,000	\$6,999	\$7,001 (Total)

*For comparison purposes ice machine capacity 900lb/day at 230V (90° ambient temperature/70° water temperature)

*Based on 6000 BTU Unit supplying up to 3 individual 48" bins

*Power Cost based on \$.12/kWh

KOOLFAST

Energy Usage

Wattage = Amperage X Voltage

Wattage = 8.2 X 115

Wattage = 943W

943W = .943 kW

.943kW X 24 hours per day (chiller usage) = 22.632 kW hours per day

22.632 kWh/day X 365 days per year = 8260.68 kWh/year

8260.68 kWh/yr X \$0.12 per kWh =

\$991.28 per year

@ 24 hours/day

\$660.85 per year

@ 16 hours/day

\$413.03 per year

@ 10 hours/day

*Why would you run unit 24 hours per day,
if it only takes me 5 minutes to “recharge” product
left in Koolfast unit overnight?*

The Original

Like all of our KoolFast™ Chilling units, our fiberglass series offers super-fast chilling of your product while offering maximum brand exposure. Our original KoolFast design, this is the cooler unit started it all. With its deep 10" bin with indoor/outdoor functionality, this unit can handle all of your chilling needs.

Features

1. Long Lasting, Durable fiberglass construction.
2. Uses 115V electrical service alleviating costly electrical upgrades
3. Optional locking lid and dividers and LED lighting.
4. Intelligent thermostat controls, with one touch operation.
5. Only two consumables needed, Power and Filtered water.
6. Designed for indoor and outdoor use.

Captivate your audience, with this unique and tasteful branding show piece.

Specifications

Width	48"
Depth (Bin Depth)	24"(10")
Height	36"
Capacity	200 Quarts
Number of 12 oz Bottles	140
Number of 12 oz Cans	166
Number of 16 oz Cans	133
Number of 20 oz Bottles	111
Number of 24 oz Cans	66

Visual Merchandiser

Our upscale visual merchandiser is designed to be seen. This indoor model has all the same great features as the rest of our line, but in a smaller compact version while allowing you to showcase top-shelf products and up-front brand exposure.

Features

1. Long Lasting, Durable Acrylic construction.
2. Designed for indoor and outdoor use.
3. Uses 115V electrical service alleviating costly electrical upgrades
4. Optional locking lid and dividers and LED lighting.
5. Intelligent thermostat controls, with one touch operation.
6. Only two consumables needed, Power and Filtered water.

Displaying product is the ultimate intention of this merchandiser, perfect height for wine.

Specifications

Width	33"
Depth(Bin Depth)	18"(12")
Height	36"
Capacity	50 Quarts
Number of 12 oz Bottles	91
Number of 26 oz Wine Bottles	55
Number of 16 oz Cans	75
Number of 20 oz Bottles	50
Number of 24 oz Cans	45

Mobile Ready.

Working with a leading industry manufacturer, we have developed a large capacity, durable, portable, self contained chilling merchandiser. No need to run for ice, EVER.

Based on the RotoTough Texas Icer™ by IRP, this unit has four graphic panels for maximum brand exposure whether it is installed in a permanent configuration or as a stand alone portable merchandiser in open areas. Four heavy duty casters allow this unit to be moved effortlessly. Its large-capacity insulated bin and optional locking lid make this unit the perfect choice for secure chilling and storage.

Features

1. Long Lasting, Durable fiberglass construction.
2. Designed for indoor and outdoor use.
3. Uses 115V electrical service alleviating costly electrical upgrades
4. Optional locking lid and dividers and LED lighting.
5. Intelligent thermostat controls, with one touch operation.
6. Only two consumables needed, Power and Filtered water.

This unit is ready to travel, and game ready. A great plug and play edition to any big outdoor event.

Specifications

Width	48"
Depth (Bin Depth)	24"(7")
Height (w/5" Casters)	38"
Capacity	140 Quarts
Number of 12 oz Bottles	140
Number of 12 oz Cans	166
Number of 16 oz Cans	133
Number of 20 oz Bottles	111
Number of 24 oz Cans	66

The Back Bar Warrior

This sleek and durable 22 gauge stainless steel bin features a front apron, back-splash, and a solid understructure, making this unit - one that's built for years of operation. A rubberized lower chiller deck provides some additional storage for this unit designed to withstand high volume commercial use and abuse. **Available in four sizes**, these units are designed for maximum adaptability to your available space.

Superior corrosion resistant stainless steel performs in the harshest conditions.

Features

1. Superior corrosion resistant stainless steel construction.
2. Uses 115V electrical service alleviating costly electrical upgrades.
3. Intelligent thermostat controls, with one touch operation.
4. Only two consumables needed, Power and Filtered water.
5. Designed for indoor use.
